user12@cloudshell:~ (project3-384713)$ gcloud init
Welcome! This command will take you through the configuration of gcloud.
 Settings from your current configuration [cloudshell-26561] are: accessibility: screen_reader: 'True' component_manager: disable_update_check: 'True'
    ompute:
goe_metadata_read_timeout_sec: '30'
bre:
    ore:
account: user12@priarworld.com
disable_usage_reporting: 'True'
project: project3-384713
etrics:
environment: devshell
   Pick configuration to use:
[1] Re-initialize this configuration [cloudshell-26561] with new settings
[2] Create a new configuration
  Pick configuration to use:

[1] Re-initialize this configuration [cloudshell-26561] with new settings

[2] Create a new configuration

Please enter your numeric choice: 1
 Your current configuration has been set to: [cloudshell-26561]
 You can skip diagnostics next time by using the following flag: gcloud init --skip-diagnostics
 Network diagnostic detects and fixes local network connection issues. Checking network connection...done. Reachability Check passed. Network diagnostic passed (1/1 checks passed).
 Choose the account you would like to use to perform operations for this configuration:
[1] user128priarworld.com
[2] Log in with a new account
Please enter your numeric choice: 1
Too many options [113]. Enter "list" at prompt to print choices fully.

Please enter numeric choice or text value (must exactly match list item): 8
 Your project default Compute Engine zone has been set to [us-centrall-a]. You can change it by running [gcloud config set compute/zone NAME].
Your project default Compute Engine region has been set to [us-central1]. You can change it by running [gcloud config set compute/region NAME].
 Created a default .boto configuration file at [/home/user12/.boto]. See this file and [https://cloud.google.com/storage/docs/gsutil/commands/config] for more information about configuring Google Cloud Storage.
Your Google Cloud SDK is configured and ready to use!
* Commands that require authentication will use userl2@priarworld.com by default
* Commands will reference project 'project3-384713' by default
* Compute Engine commands will use region 'us-centrall' by default
* Compute Engine commands will use zone 'us-centrall-a' by default
 Run 'gcloud help config' to learn how to change individual settings
This gcloud configuration is called [cloudshell-26561]. You can create additional configurations if you work with multiple accounts and/or projects. Run 'gcloud topic configurations' to learn more.
* Run 'gcloud --help' to see the Cloud Flatform services you can interact with. And run 'gcloud help COMMAND' to get help on any gcloud command.
* Run 'gcloud topic --help' to learn about advanced features of the SDK like arg files and output formatting
* Run 'gcloud cheat-sheet' to see a roster of go-to 'gcloud' commands.
